It is important to constantly revisit material you have learned, as well as continuing to learn new things. Come and review the major nerves of the upper limb. Starting with the rami of C5-T1, see how the brachial plexus is formed and review its roots, trunks, divisions, cords, and named nerves. Then follow their paths as they supply structures of the upper limb. See how different pathologies can affect these structures. This is a great osteology, myology, nerve, and pathology review, without the pressure of tests.

Dr. Ben Salloum founded the Natural Health Center in 1998. He wanted to provide a place that would help you obtain optimum health through a balanced and healthy lifestyle. This center includes: several chiropractors, 6 licensed massage therapists, an acupuncturist, an osteopath, a psychotherapist, and a health food store.

Dr. Ben is a magna cum laude graduate of New York Chiropractic College. He was a part time faculty member at the Onondaga School of Therapeutic Massage from September 1998 to December of 2010, where he has taught courses in Myology, Pathology, and Anatomy & Physiology.

Dr. Ben stays current in his field by attending continuing education seminars, reading, and promoting health through education. He is a published author for several of his articles. Dr. Ben takes pride in delivering quality services for this community.
